

# Regional STI/HIV Prevention Initiative Collaborative

## Outreach & Testing

1. Conduct targeted outreach and engagement with marginalized populations and provide rapid HIV/STI testing in the field.
2. Educate broader public on trends and impact of HIV/STIs in the region.
3. Coordinate with Pharmacy and Referral/Retention/Case Management Work Groups.

## Clinical Pathways/Order Sets

1. Create a clinical pathway for common STIs that all clinics can incorporate into workflow.
2. Create clinical pathway tool for assessing for PrEP candidacy, managing PrEP and referring to PrEP providers.
3. Create protocol for self-testing for STIs.
4. Create clinical pathway tool for STI screening among pregnant patients.

## Referral/Retention/Case Management

1. Curate list of STI Champions in the region.
2. Establish protocol for linkage of all HIV Infected persons and PrEP patients to SHS ID Department and/or STI provider champions.
3. Establish protocol for referral and linkage of STI patients to other health and social services.

## Pharmacy Working Group

1. Explore barriers to filling EPT prescriptions at pharmacies.
2. Prepare protocol for point of care to Rx delivery for EPT.
3. Apply to CCO for grant: collaborative care model using pharmacies as a point of care for testing and treatment for STI.
4. Propose pharmacy board action and legislative objectives and educate Pharmacies on EPT.

## STI Provider Champion and Provider Outreach/Education

1. Educate providers: STI updates, End HIV campaign.
2. Implement provider detailing initiative.
3. Identify STI provider super-champions in all regions and organizations.
4. Train STI provider super-champions.
5. Standardize provider and patient education materials (STI, STI/Pregnancy, PrEP, EPT).
