

The Policy Change Model - Step by Step

Identify and Describe the Problem <i>Identify, define and quantify the public health need and the policy solution.</i>	Reach Out and Educate <i>Expand networks, strengthen relationships and engage in media advocacy.</i>	Adopt Policy <i>Work with policy makers to formally adopt the policy.</i>
<ul style="list-style-type: none"> » Define the problem using the most current and relevant information available » Assess current policies to identify gaps and necessary improvements » List best practices to address problem » Synthesize evidence about effective public health policy options » Define policy solution 	<ul style="list-style-type: none"> » Engage with decision-makers about the public health need and policy solution » Reach out to decision-makers through champions and networks » Identify, research and resolve concerns » Track support and its change over time 	<ul style="list-style-type: none"> » If a formal adoption process will take place, plan for public comment to support the policy » Provide information to decision-makers » Count votes before the actual vote » Anticipate possible last minute amendments
Engage Stakeholders <i>Identify and reach out to organizations and individuals with a stake/interest in the policy change.</i>	Public Education	Implement Policy and Support Compliance <i>Communicate policy change with all affected audiences.</i>
<ul style="list-style-type: none"> » Network, build and/or maintain relationships » Find champions and supporters » Develop a diverse coalition » Build consensus for chosen course of action 	<ul style="list-style-type: none"> » Develop a cohesive education plan that incorporates multiple methods of outreach » Use information gained from assessments to create effective messages » Conduct meetings, events, presentations and other types of outreach, including media when appropriate 	<ul style="list-style-type: none"> » Develop a comprehensive communication plan » Redesign environments to support effective implementation and compliance » Monitor implementation
Assess Readiness for Policy Change <i>Assess if there is political will and community support for policy change.</i>	Draft Policy and Plan Implementation <i>Draft the best possible policy, given political and other constraints.</i>	Evaluate Impact <i>Evaluate impact of the policy change.</i>
<ul style="list-style-type: none"> » Assess community support for policy change: poll county commissioners, the general public, and other important groups » Identify stakeholder support for policy change through informational interviews, focus groups and polls/surveys » Collect and review actions and successes from other jurisdictions » Estimate the health, fiscal, administrative legal, social and political implications » Note: think through to end game – plan for evaluation now! 	<ul style="list-style-type: none"> » Clarify agency process for drafting and proposing policy » Identify resources, such as a model policy, and examples from other jurisdictions » Plan a policy review process that incorporates legal and policy expertise » Monitor the policy drafting process » Develop plan to monitor and assist with enacting the change (e.g., develop budgets, rules, procedures, materials) » Create a communication plan for policy roll out » Work with other entities on structural and programmatic adjustments to assist with effective implementation 	<ul style="list-style-type: none"> » Track the implementation process (Is the policy and plan functioning as intended?) » Monitor policy/systems/environment change » Evaluate effectiveness of the policy change process » Incorporate evaluation findings into future planning
Based on assessment findings, is there political will to pass the policy? If not, conduct education with decision makers and, if necessary, the public.		<p>Continuous Quality Improvement</p> <p>Develop measures of success in order to: Check progress; Reinforce positive work; Identify areas needing improvement or more attention; Reassess and make course corrections.</p>
